

Tutorial

Creative Web Resume

This is a quick tutorial to help you set-up our web template. It covers the different steps you need to take and tips and how to modify certain elements of the template.

Creative Web Resume tutorial

- 1 Upload all the files on your web server.
- 2 Modify the **index.html** with your content.
- 3 Put your email on the **config.php** to receive emails from the contact form.
- 4 To change the skills bar diagrams change the tag class according to your needs: ie
(six-bars-half = 6 bars and a half)
- 5 Update the href tag of the social links with your own
- 6 Upload your small and big images for the portfolio item and your profile pic and modify the html accordingly for the lightbox popups.

Of note you need to have advance **HTML/CSS skills** to modify this template.

We cannot help you more than giving you tips if you cannot update the template according to your needs.

Sincerely,

The Pixeden Team.
